

# Making math more meaningful... and fun!

## A Learning Through the Arts® Teacher Institute

### Grades 1-8

Discover how much fun math can be when you inject creativity into every day math lessons. During this hands-on workshop you will explore fresh approaches to teaching math curriculum, and leave with differentiated instruction techniques infused with movement and dance to use in your classroom. Energize your teaching and watch students come alive as they dance through the math curriculum. See why research showed that LTTA students scored an average of 11 percentile points higher in math than their non-LTTA peers. Math has never been so much fun!

Friday, November 13, 2009  
TELUS Centre for Performance and Learning  
273 Bloor Street West, Toronto

\$198 - Includes lunch and an extensive handbook
